September 8, 2015

Dear Sir/Madam,

I have learned about your current opening for a Junior .NET Developer and after I acquainted myself with your company's focus about giving each customer the attention they require and the company's belief in nurturing and developing their employees talents I have come to strongly believe that I am the perfect candidate for the position. Because of my qualifications and excellent education in the software industry and my personal beliefs which match that of your company I am sure I will be a helpful addition to Accedia.

As a student in Software University I have finished the courses for OOP, High Quality Code and Advanced C# as well as Programming Basics with excellent marks all of which have been taught with C# on the .NET Framework. In addition I have taken part of all teamwork projects, workshops and Labs for the aforementioned courses, which require teaming up with colleagues to create a project with real world applications.

In my Advanced C# Teamwork project, when my colleagues didn't have ideas about what to do I came up with a project idea, created a project in Trello, a development plan and divided the work, so that the project would be finished in time. In my High Quality Code Teamwork we had to orient and refactor the poorly written code of a functioning medium sized application, where I wrote and implemented 80% of the unit tests. During the High Quality Code course I also learned and used additional software for tracing bottlenecks such as dotCover, code coverage tools like dotCover and analysis tools like StyleCop.

Because of the aforementioned I believe that I have the determination and skills to become an important part of your team and help Accedia continue to provide it's high quality services.

I look forward to hearing from you.

Sincerely,

Victor Kazakov
